The Last Table (Table No. 22) represents the problems faced by the villagers most of the time. Here we mention about the five categories as: Road condition and availability,

Availability and accessibility of Water (Specially Drinking Water), Problem of waste management, problem of financial support and Problem of Habitat loss. Here we see that there is a huge problem of availability of Drinking water in every village. Water scarcity limits access to safe drinking water and practicing basic hygiene at home etc. Water crisis affects mainly at Nalgora, Buria and Korangahut. The second major problem in these villages is problem of waste management. In general, in rural areas, waste is generated from agriculture, kitchen, garden, cattle sheds etc. In Korangahut and Buria, transportation problem and worse condition of road is another constraint. At Nalgora and Mathurapur-II, financial services is a problem as agriculture and other rural economic activities have characteristics of dependence on natural resources and vulnerability to multiple risks. At Nalgora, also Habitat loss is a problem and it is a primary concern of this village.

In a nutshell, the major problems are lying in Waste collection and management, Supply of Water specially Drinking Water and expansion of cultivable land and we have to solve these issues.
